

STATEMENT OF PURPOSE

RS23604

Electricity purchased from a public utility as defined in Section 61-129, Idaho Code and is resold to other users is an activity that would be subject to the jurisdiction of the Idaho Public Utilities Commission. This legislation would allow the purchase of electricity from a public utility that is resold to charge the batteries of an electric motor vehicle to be conducted under an Order or Rule of the Public Utilities Commission.

FISCAL NOTE

There is no fiscal impact to the General Fund. The Idaho Public Utilities Commission is a self-sufficient regulatory agency which derives its funding from annual fees assessed against the public utilities it regulates. It is likely that the Commission will require additional funding to perform the additional functions described in this Act.
